

- 1) Go to **/n/iwfn/traces** Transaction
- 2) Double Click on the user from which you logged in and check the payload trace check box

- 3) After you click on payload traces tab select all and delete the available data. Now on mobile app click on item text icon which is highlighted.

4) Now simultaneously on traces tab click on refresh button you will get the collection being called. After you get the collection name double click on that collection as shown below.

5) After you double click on that collection you will see 2 lines as shown below.

On the second line under call type you will see Response field on which you have to double click and you will be able to see the services being called for that collection as shown below.

SAP Gateway: Payload Trace

Client 100

Date	Time	User	Call Type	Method	Service Call Info	Transaction ID
07.07.2017	08:55:14	MINVENTORY1	Request	GET	/INVMM/MINVENTORY_2_SRV/GRPOHeaderCollection?\$filter=EXTENSION%20eq%20%2D	E11863E7F1ACF1FE99C60ASF56F050F3
